Dinolift at Bauma 2025: Introducing Two New Breakthroughs

Dinolift Oy, the leading Finnish manufacturer of DINO lightweight aerial work platforms, is set to showcase an innovative suite of lifts at Bauma 2025, taking place at the Trade Fair Center Messe München in Munich from April 7 to 13, 2025.

This year, Dinolift is proud to introduce two innovations – the upgraded all-electric **DINO 280RXTE Long Range** with an extended battery that delivers up to 2x the runtime, and the slim version of **DINO 120TLB**, making its first global launch as a compact telescopic trailer designed for effortless towing, superior maneuverability, and versatile work at height – alongside our advanced **DINO 180XTB II**.

Our Bauma 2025 Highlights Include:

- **DINO 280RXTE Long Range**

This upgraded model from the all-electric RXTE series now features a new extended AGM battery (580AH) that delivers significantly enhanced runtime – up to 2x the operating time of previous versions. Engineered for silent, zero-emission performance, the DINO 280RXTE Long Range is ideal for sites with emission or load restrictions, ensuring robust drive and boom operations while supporting environmental sustainability targets.

- **DINO 120TLB**

Launched last year at FinnBuild in Finland and making its first global debut at Bauma 2025, the DINO 120TLB is the newest, compact addition to our telescopic trailer family. Designed for effortless towing and smooth maneuverability, it redefines work at height by combining lightweight design with high-performance capabilities. This model is perfect for challenging job sites where precision and agility are paramount. Now we introduce a narrow version that makes the lift even more versatile in working sites with tight size limitations.

Additionally, the articulated telescopic trailer **DINO 180XTB II** will also be exhibited.

We invite you to visit us at our stand **FS.1205/3** to experience these innovative solutions firsthand.
